

Exercise 2.5 Journal

1. <https://www.epicurious.com/>

- I like how you can search for recipes and how they have popular recipes at the top of the page. The nav bar at the top of the site makes it easy to find recipes, and you can find recipes by certain ingredients.

2. <https://www.foodnetwork.com/>

- Being able to search for recipes from your favorite chefs is a cool feature for this website. I like the grid system for the website as it flows nicely and is easy to navigate.
